***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this amendment was given in a telephone interview with Peter Zura on 9/13/07.

Claim 7. (currently amended): A method for connecting exchanges via a packet-oriented communication network, wherein switching of exchange-internal voice data takes place on the basis of substructure elements, and data transmission via the packet-oriented communication network involves Internet Protocol data packets, and the connecting exchanges are connected to the packet-oriented communication network via a respective conversion device, the method comprising the steps of:

subdividing the Internet Protocol data packets into substructure elements;

providing that each of the substructure elements include both a cell header and a useful data area;

transmitting, via a transmitting one of the connecting exchanges, voice data to be transmitted as substructure elements to an associated transmitting conversion device;

inserting, via the transmitting conversion device, the voice data substructure elements into the subdivided Internet

Art Unit: 2619

Protocol data packets unchanged, wherein no compression or decompression of the voice data is performed;

transmitting the subdivided Internet Protocol data packets from the transmitting conversion device to a receiving conversion device;

extracting, via a receiving conversion device associated with a receiving one of the connecting exchanges, the voice data substructure elements from the received subdivided Internet Protocol data packets, wherein no compression or decompression of the voice data is performed; and

forwarding, via the receiving conversion device, the extracted voice data substructure elements to the receiving one of the connecting exchanges unchanged.

#### ***Reasons for Allowance***

2. Regarding independent claim 7, although the concept of real time voice transmission over the Internet was well known at the time of the invention (Neubauer: 6,269,095), none of the prior art of record teaches or fairly suggests "inserting, via the transmitting conversion device, the voice data substructure elements into the subdivided Internet Protocol data packets unchanged, wherein no compression or decompression of the voice data is performed" in combination with the other limitations of the claim.

**Conclusion**

3. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance."
